

**project name** San Pedro Development Project

**client** Government Of San Pedro (Paraguay)

Lions Club "John F. Kennedy", Lambaré (Para-

guay)

**Iocation** Department of San Pedro (Paraguay)

**project duration** begin january 2004

end april 2004

To increase the regional economic development it was planned to improve the reginal road connection:

- asphalt pavement of 120 km (75 miles) rural roads
- 1.5 km (0.75 miles) road bridge over Jejui Guazú River

For the towns of Choré, General Elizardo Aquino, Villa del Rosario and Itacurubí del Rosario:

- pavement and drainage of vicinity roads
- four sanitary sewer and sewage treatment systems servicing populations of 1.700, 2.240, 4,110 and 3,040 persons

For five rural settlements:

- community center improvement
- water supply, sanitation and off grid photovoltaic power supply

Jejui Guazú river, San Pedro typical colonial building (c), example of proposed sewage treatment plant (r)

## responsibilities

feasibility study:

- · definition of target populations and assessment of needs
  - · development of aims, tasks and key figures
- conceptual design for the most promising projects to reach the aims
- estimate of costs and risks for the program and the individual projects and project schedule
  - definition of the organizational framework
